

Abstract		None
<b>Models</b> Application, Log, Admin, Projects, Resources, Team Models		
• Define Schemas for mongoDB	• Databases	

		None
<b>Databases</b> Application, Log, Admin, Projects, Resources, Team Schemas		
• Store Data • Query Data • Create Schema	• Models • Controller	

		None
<b>Config (environment)</b>		None
• Define environment variables (proxy port and database connection)	• None	

		None
<b>Server</b>		Routes, Controllers
• Provide communication instance for endpoints and frontend • Store application global variables and states	• Axios	

		Server
<b>Routes</b>		Endpoints
• Define paths for endpoints	• Controller • Endpoints
